DETAILED ACTION

Remarks

This Office Action fully acknowledges Applicant's remarks filed on October 19th, 2009. Claims 37-39, 40-46, 48, 49, and 51-53 are allowed. Claims 1-36, 47, 50, and 54-66 have been cancelled.

Election/Restrictions

Claims 37-39, 40-46, 48, 49, and 51-53 are allowable. The restriction requirement directed toward the election of species within Group II, as set forth in the Office action mailed on February 17th, 2009, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 40-43, directed to previously non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim (claim 37). However, remaining claims 1-36, 47, 50, and 54-66, directed to non-elected inventions are withdrawn from consideration because they do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clifford Perry on January 26th, 2010.

The application has been amended as follows:

In the claims –

48. The system of claim ~~47~~ 37, wherein the first and second reference elements comprise resistors.

49. The system of claim ~~47~~ 37, wherein:

the first reference element comprises a third measurement probe, the third measurement probe operable to interrogate one or more physical properties of the first sample at a second location of the first sample, and to output, in response, a third measurement signal; and

Art Unit: 1797

the second reference element comprises a fourth measurement probe, the fourth measurement probe operable to interrogate one or more physical properties of the second sample at the second location of the second sample, and to output, in response, a fourth measurement signal.

51. The system of claim ~~50~~ 37, wherein the comparator further comprises a phase meter having a first input coupled to the output of the first differential amplifier, and a second input coupled to the output of the second differential amplifier, the phase meter operable to output the relative phase difference between the first and second differential amplifier outputs.

Allowable Subject Matter

Claims 37-39, 40-46, 48, 49, and 51-53 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record, namely Guruswamy, Kaiser, and Arwin do not teach or fairly suggest the system operable to monitor one or more bio/chemical activities within a first sample relative to a second sample, as claimed in claim 37.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, see pages 16 and 17, filed October 19th, 2009, with respect to the objection to the drawings and the rejection of the claims under 35 USC 102(b) and 35 USC 103(a) have been fully considered and are persuasive. The objection and rejections have been withdrawn in view of Applicant's arguments and amendments to drawings, specification, and claims.
